

Clark Forklift

Clark Forklift Forklift Training - Performing globally, there are at this time 350,000 Clark forklifts and lift vehicles in operation, with in excess of 250,000 of those in use in North America. Clark has five main lines of forklifts across the globe, making it one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 unique models of lift trucks, with parts covering more than 120,000 particular components for all of its automated equipment. Your local Clark Dealer is your total source for availability of all your parts requirements offered by Clark Totalift.

Clark's extraordinary Parts Distribution Facilities are conveniently situated in Louisville, Kentucky, which serves both their customers and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Motivated to supply the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to improving productivity and benefiting performance.

Clark Totalift has a very outstanding global support network. With over 550 locations globally, seller representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the material handling industry.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of modernization in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is at this time a standard feature on every forklift.

Clark's recurrent goal to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck producer across the globe to be certified with the globally approved quality standard ISO 9001 for all of their production facilities. Also, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any environmental limitations, thus placing them in a prevailing industry position.

Resource Efficient Production

Clark has selected the system of "Lean Manufacturing" at all of its assembly plants for the reason that this method is extremely economical and allows for minimal use of resources. Established to guarantee maximum efficiency, this system is intended to discover and acknowledge the most effective ways for production facility management. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Engine Design

Clark's product engineers and suppliers join together to improve the effectiveness and excellence of their merchandise while minimizing expenses. The new value engineering agenda combines progressive product development and offers superior consumer support and service within the industry.
